Re: United States, et. al., v. Essroc Cement Corp.

Dear Mr. Schworer:

Please find attached, for Essroc's review and comment, the United States' proposed First Modification to Consent Decree, which gives effect to our ongoing discussion of a resolution of the dispute over the SCR Study at Logansport Kiln 1. The proposed modification is a written agreement which requires the approval and signature of authorized federal and affected state officials. Please let Seema Kakade or me know your comments on this proposed Modification. If the proposed First Modification is acceptable, we can move forward towards approval and signature from higher levels of federal and state officials. Otherwise, we can schedule a call to go over it. Thank you for your attention to this matter.

Sincerely,

Elliot Rockler  
Trial Attorney
